A MTBLS79 cow vs sheep

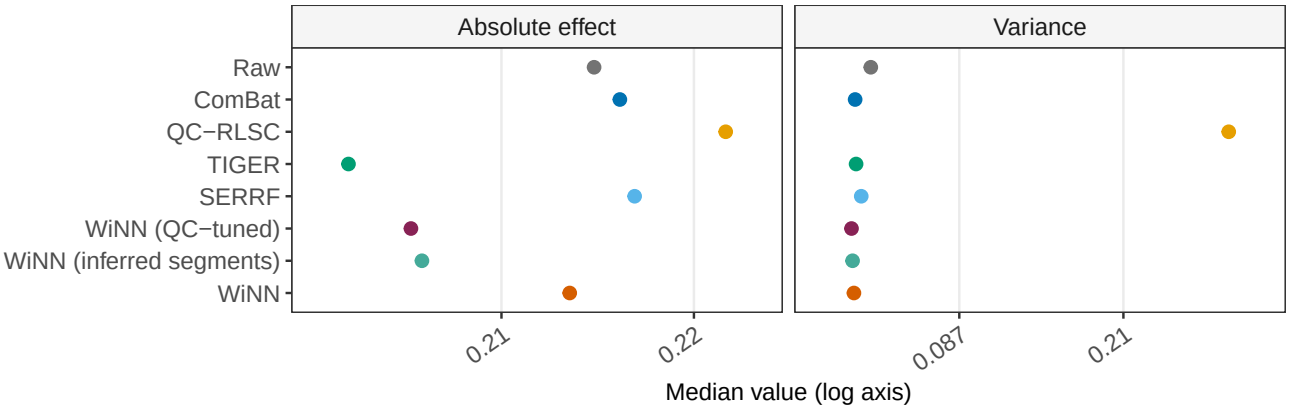

Null tails and observed counts

5,000 constrained permutations.
p = (1 + null counts >= observed) / 5,001.

B MTBLS79 cow vs sheep

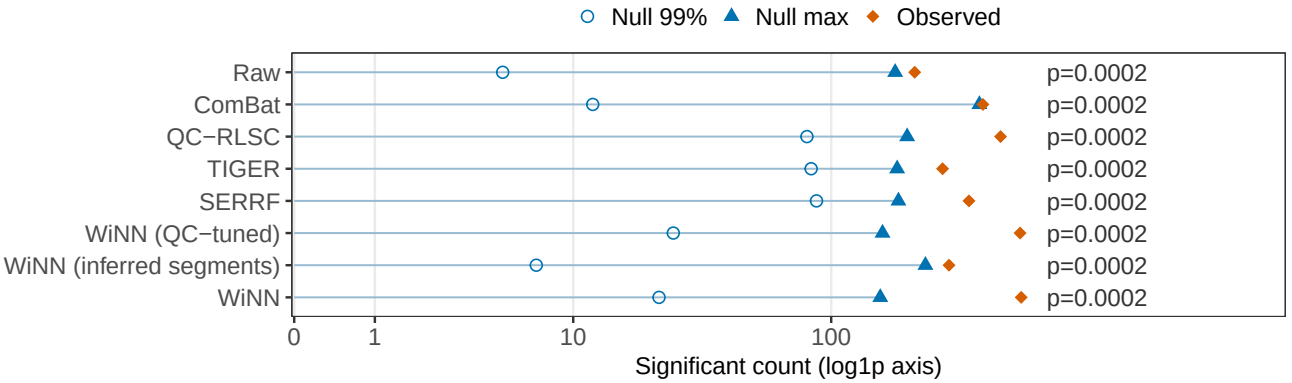

Absolute effects and variances

Effects: log1p intensity scale.

C WaveICA deposited groups

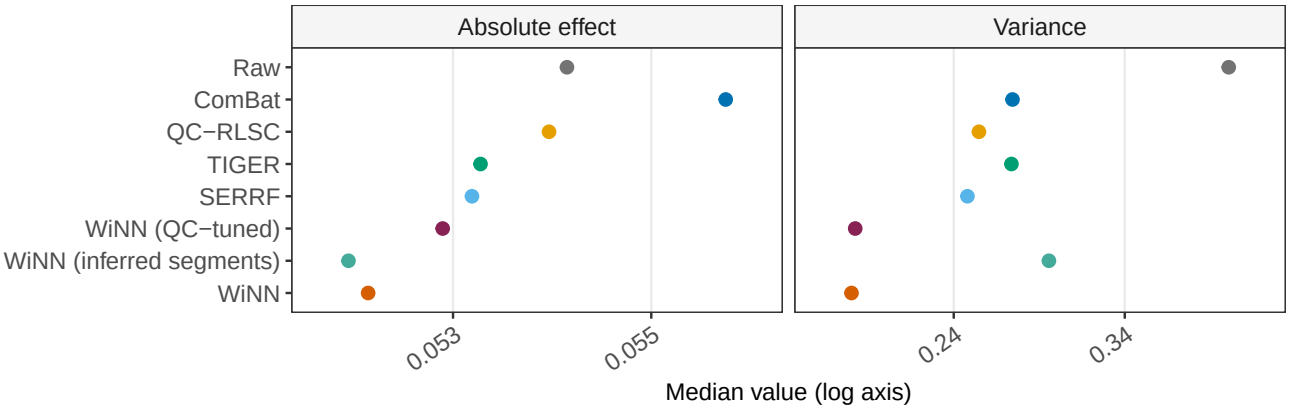

Null tails and observed counts

5,000 constrained permutations.
p = (1 + null counts >= observed) / 5,001.

D WaveICA deposited groups

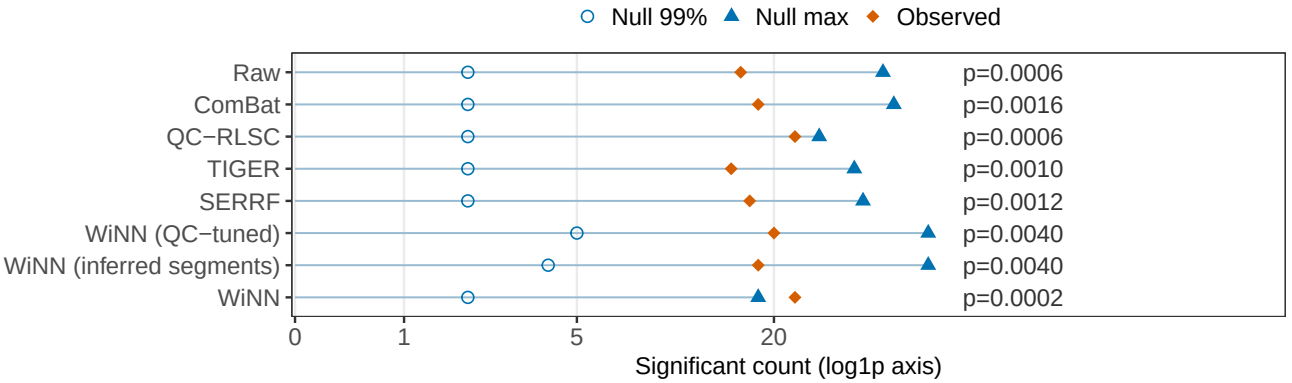

Absolute effects and variances

Effects: log1p intensity scale.

E Sacurine age

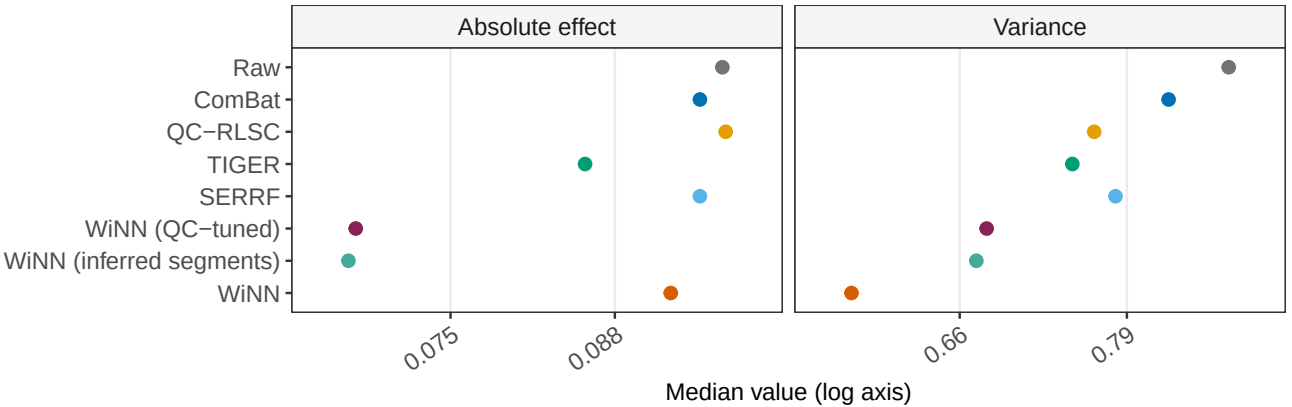

Null tails and observed counts

5,000 constrained permutations.
p = (1 + null counts >= observed) / 5,001.

F Sacurine age

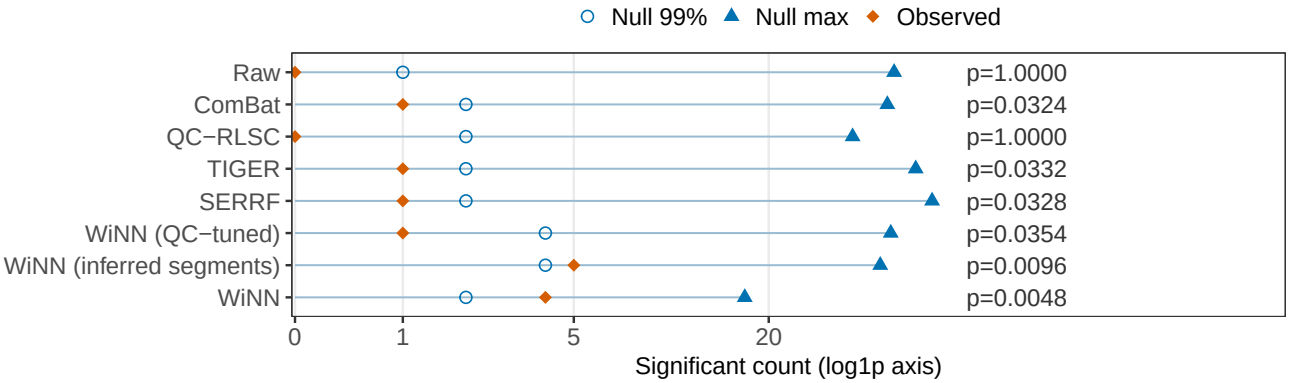

Absolute effects and variances

Effects: log1p after osmolality scaling.

G Sacurine BMI

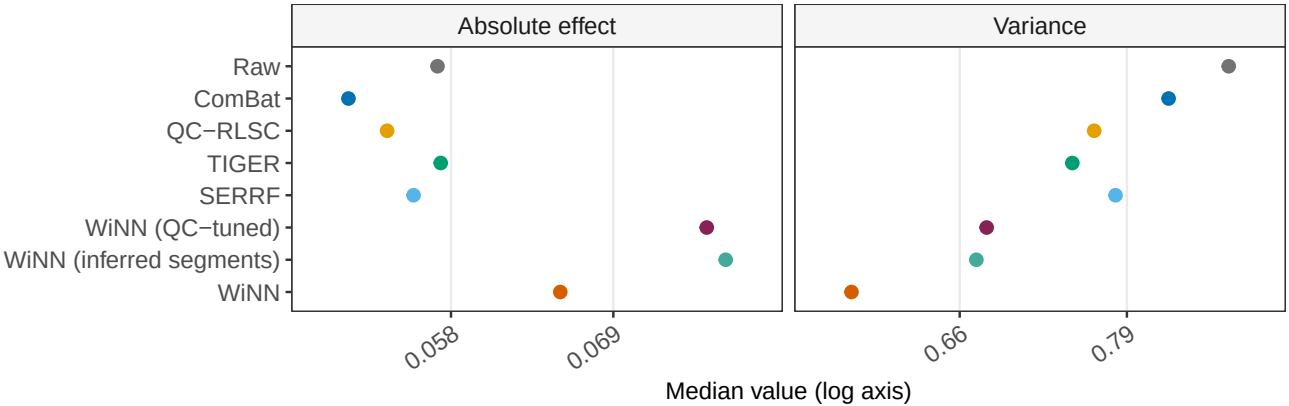

Null tails and observed counts

5,000 constrained permutations.
p = (1 + null counts >= observed) / 5,001.

H Sacurine BMI

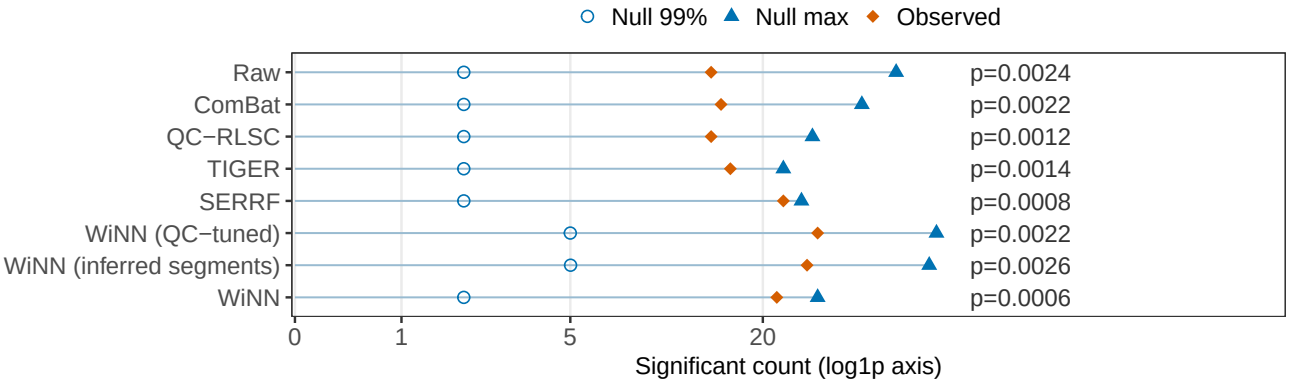

Absolute effects and variances

Effects: log1p after osmolality scaling.

I Sacurine gender

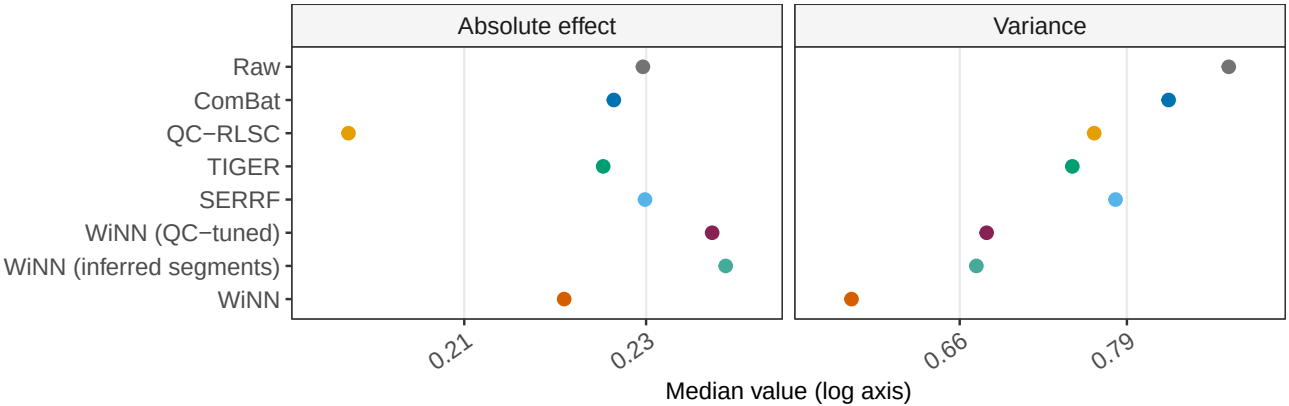

Null tails and observed counts

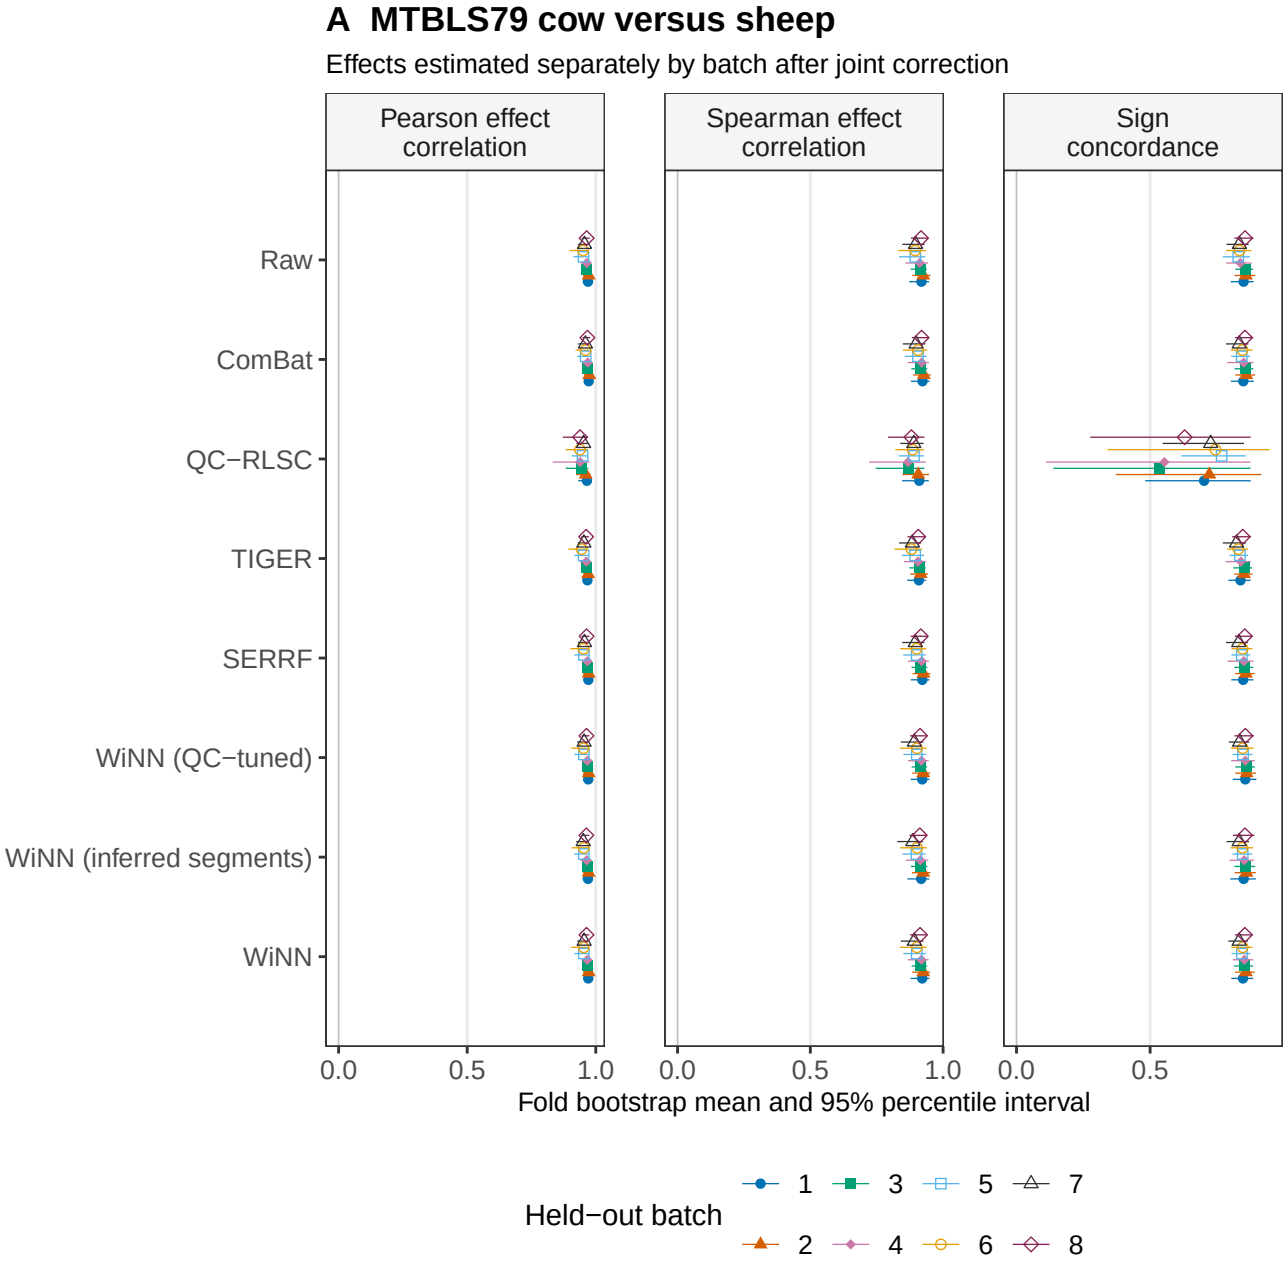

5,000 constrained permutations.
p = (1 + null counts >= observed) / 5,001.

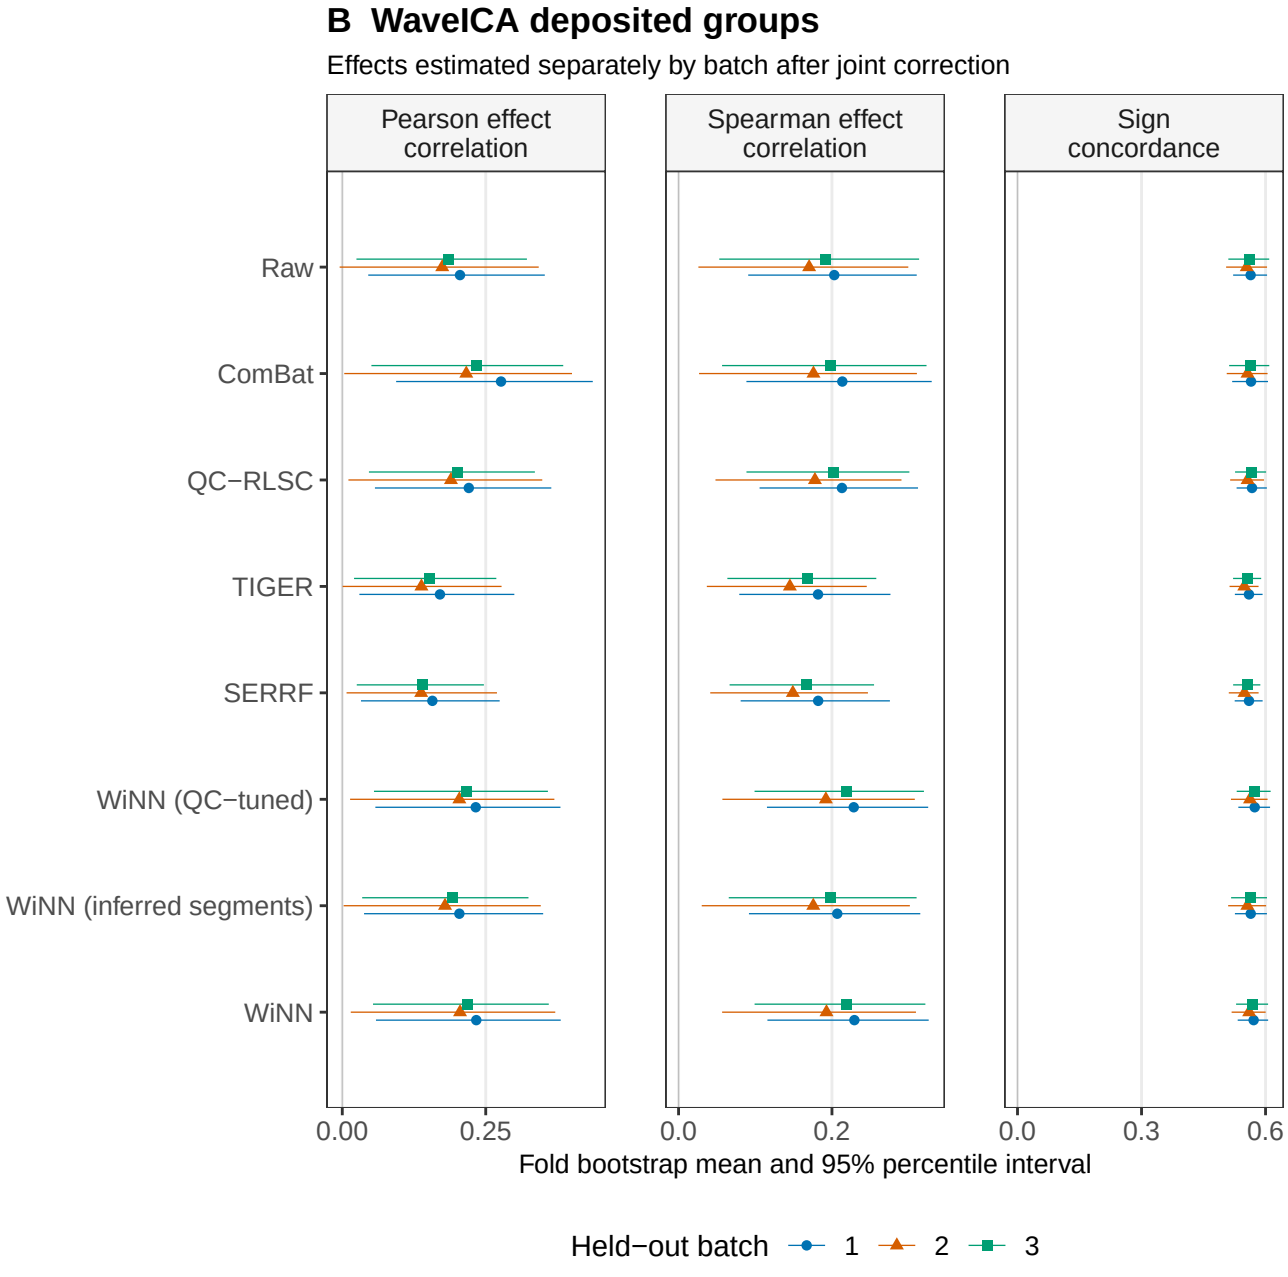

J Sacurine gender

Absolute effects and variances

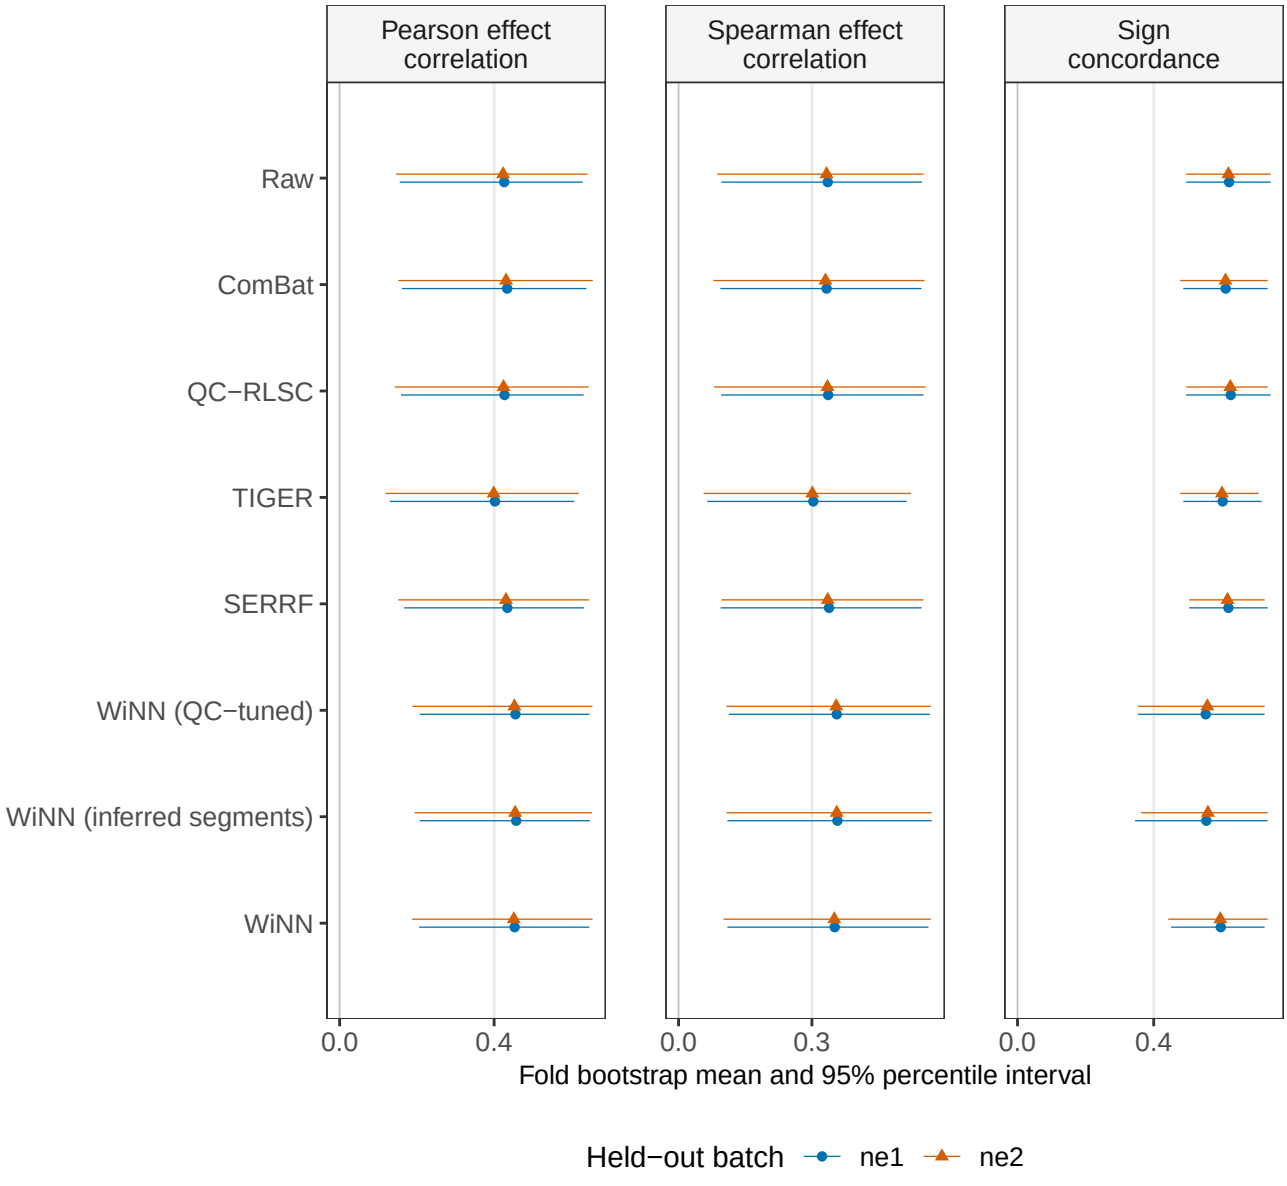

Effects: log1p after osmolality scaling.
